Feature Support Information

- Driver Options is available on Microsoft Windows® 10. Always update to the latest gaming drivers for the best user experience. This feature is not available with multi-GPU configurations nor with Radeon™ Pro Duo (“Polaris”). This is not available for mobile platforms.
- Multi-GPU Eyefinity Pro on Microsoft Windows® 10 only supported on Radeon™ Pro WX 7100.
- Framelock/Genlock: In multiple platform configurations where more than one S400 Sync Module is in use, 4K resolutions at 60Hz and greater are not supported.
- Fan Control is available for changing fan speeds across different GPUs under the Global Tuning tab.
- Radeon ProRender now supports AMD XConnect allowing for rendering acceleration via both the internal and external GPUs.

Support Notes

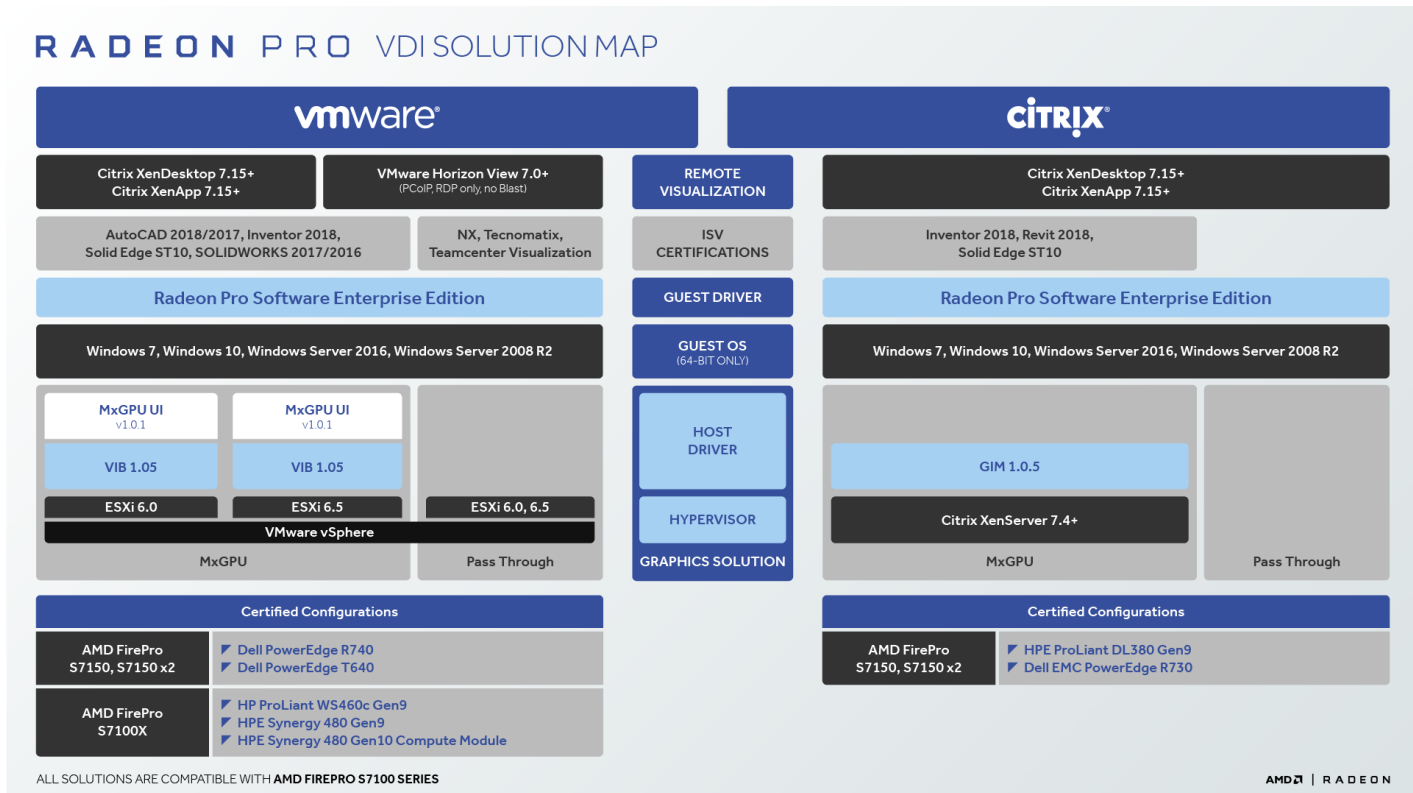

- This driver is not intended for use on Radeon™ products running in Apple Boot Camp platforms. Users of these platforms should contact their system manufacturer for driver support.
- When installing this driver for the Microsoft Windows operating systems, the user must be logged on as Administrator, or have Administrator rights to complete the installation of Radeon Pro Software for Enterprise 18.Q4
- AMD Radeon™ Products supported in this release have not been tested for Enterprise Quality.
- AMD XConnect in this driver release does not support **Vega M GL graphics**.

AMD Radeon™ Graphics Support

Starting in 18.Q4, AMD is including Radeon products in our Enterprise driver. This is being done in consideration of the fact that enterprises use both professional, commercial, and consumer hardware. This driver is recommended for Radeon hardware being used in commercial use cases with productivity applications. This includes users who need to review CAD data as part of their workflow. It is not recommended for gaming. Workstation performance, features, and application certifications do not apply to Radeon hardware and no end user benefit will be observed without Radeon Pro hardware.
